

## Eurocamp is first holiday company in Europe to be Friendly WiFi certified

One of the oldest and best campsites operators, Eurocamp have been providing fun filled family holidays across Europe for over 40 years. Expanding over those years with new camps in exciting new locations and introducing mobile homes as an option, meaning they could provide rustic campsites through to stylish resorts.

Fun, enjoyment and making memories is at the heart of what they do and they make sure that there are lots of things to do at each of their venues from waterparks, entertainment, adventure areas or just by being close to beaches, lakes or woodlands.

Although they want families outside enjoying the weather and all the amenities available to them, Eurocamp recognised that some down time was important as well as keeping in touch with friend and families at home – even if its just to be able to show and tell them what a good time they are having. To achieve this at their corporately operated campsites they provide a WiFi service across their different sites to keep their holiday makers connected and to give mums and dads a bit of peace after a busy day.

Parents always want to keep their kids safe, and online is no exception. Eurocamp therefore took the step to have their WiFi services Friendly WiFi certified, giving parents peace of mind that when the kids where chilling on their phones, ipads or whatever device they took, that they couldn't be exposed to indecent material providing relaxing time for parents with no worries. Eurocamp wish for the campsites they work with to also become Friendly WiFi certified so parents are informed before they choose their destination – it's good to know!!
